Your Watch a Compass.

An ordinary watch will serve as a reliable compass. Hold the watch horizontally, point the hour hand in the direction of the sun, and half way along the arc which the hour hand has traversed since pointing to 12 is the point marking south, if the time is p.m. If the time is a.m. then the point which marks south, when the hour hand is pointed to the sun, is the half of the arc the hour hand has yet to traverse to the hour of 12.

Standard time should be the basis of reckoning. This improvised compass is only possible to use when the sun can be located.

News Briefs.

With more than half its wheat crop harvested, Manitoba reports the grade so far exceptionally good, it is stated by J. M. McKay, general agricultural agent, Canadian Pacific Ry., Western Lines, Oatting is now general over the prairies, says the report.

"The employees may have every confidence that as in the past, they will be dealt with fairly," says a statement issued recently asking employees of both the C. N. and C. P. Ry. to accept wage deductions in a spirit of co-operation with the management. Grant Hall, Vice President, C. P. R., and S. J. Hungerford, acting President, C. N. R., signed the statement.

For the first in its history the Pacific Great Eastern Ry. will for 1933 show a net operating profit, says Robt. Wilson, executive secretary of the railway.

Sir Julian Cahn's company of outstanding cricketers who arrived in Canada on the Empress of Britain recently are scheduled to play in Quebec, Montreal, Ottawa, Toronto, St. Catharines, Hamilton and London, and also in Chicago, New York and Bermuda and will return to England from New York Sept. 27.

Hon. G. Howard Ferguson, Canadian High Commissioner to the United Kingdom, arrived at Quebec recently on the Empress of Britain to spend a couple of months' holiday. He stated that trade improvements in the Old Country is very marked and that he was eager to study prospects for bettering business relations.

When a Chinese says "hiya" he is not greeting you or politely passing the time of day. He is asking you to get out of his way, is the information given by Miss A. C. Stewart, of Vancouver and her party of 25 Canadian women who came back on the Empress of Britain from a six weeks' tour of the Orient.

Canada being also a Pacific Power is keenly interested in the Fifth Biennial Conference of the Institute of Pacific Relations recently held at the Banff Springs Hotel in the heart of the Canadian Rockies. Canada has been an active member of the Institute since its inception at Honolulu in 1925.

Stony Plain and District

Mrs Jac Becker and family have moved to the University district, Edmonton.

Miss Christine Pailer, a graduate of S. P. High, has entered the hospital at Vegreville, to train for a nurse.

Mr Otto Oppertshausen and Master Albert, of Rochfort, spent the week-end with friends here.

Miss Nora Brooks, Edmonton, spent the week-end here, the guest of Miss Kowenski.

Miss Jean Robertson returned Saturday from a fortnight's visit with friends at Rochfort.

Miss Q. Donaldson has resumed her duties as teacher at Kiuno.

Miss Vera Shreeves, who had been spending a vacation with Miss Stamb, has returned to her home in Leduc.

Mr and Mrs Geo Shreeves were renewing old acquaintances in Stony, on Saturday evening last.

Miss Iva Summers, who had been spending her vacation here, the guest of Miss Dannbauer, was called home owing to the sudden death of her 14-year-old brother, Jas. A. Summers, in Edmonton.

Stony Plain Public and High schools re-opened on Tuesday with the usual full complement in each of the classes. The instructors were the same as last session: The Misses Wood, Eversman, Collicutt, and McDonald, and Mr D E Moyer.

While driving his car along 102d ave., Edmonton, Saturday last, Stan Jameson inadvertently struck a pavement laborer named Gofuk, who had stepped in the path of his motor car. The laborer received injuries to his hip and his head.

A Farewell Reception.

Given in honor of Miss Hazel Becker, a farewell reception was held by her many friends, last Thursday night. The entertainment took place near the local exhibition grounds and was a success in spite of the cold, rainy weather. Marshmallow and corn roasting was the main attraction and the rest of the time was devoted to the playing of games. Attendants report to have had a very good time. Among the present were—

The Misses—

Hazel Becker
Nora Brooks
Vera Peters
Nora Kowensky
Erma Michael
Annie Wudel
Margaret Gannon
Rachel Wille

The Moors—

Pat Gannon
Bill Gannon
Henry Pailer
Walter Larson
Albert Wudel
George Trapp
George Michael

Statesman From Antipodes Issues Grave Warning Respecting Building of Warships On Pacific

Hon. William Downie Stewart, M.P., former minister of finance in the New Zealand Government, the statesman who negotiated the trade treaties between New Zealand and Australia, Canada, Japan and Belgium, started members of the Institute of Pacific Relations by declaring the institute might well have taken up as a subject for discussion the present feverish building of battleships by great nations on both sides of the Pacific. His view was that if causes of friction were to be studied, building of war fleets could not properly be ignored. This should be done before serious events occur, he said.

"I am not a pessimist," he exclaimed towards the conclusion of his vigorous speech delivered from his wheel chair, for he is permanently crippled. "I may be a fatalist insofar as I realize if certain factors are at work they will produce a certain result unless a solution is found."

"When I see on both sides of the Pacific great nations feverishly building battleships, armadas manoeuvring, I am bound to ask myself what for. If you build a mill it wants grist."

"There is no peace machinery in the position," he continued, "and so the position seems to me grave and serious, disturbing and menacing. I will say if you talk war you will get war. And also it is futile to cry peace."

Canadians Eating More Pork

Figures For Last Year Show 91.79 Pounds Per Person

Reminiscence of the brave old days when a barrel of pork constituted an ever-ready standby in the pioneers' larder, Canadians in 1932, according to the latest statistics, ate more pork and less beef and eggs than in the preceding three years. In 1932, also, more turkeys, ducks and geese were eaten than in 1931, but less than in 1930 and 1929. Again, in 1932 the consumption of chickens was less than in the preceding years.

Reckoned in percentages, every Canadian man, woman and child in 1932 individually consumed 91.79 pounds of pork; 66.02 pounds of beef; 6.97 pounds of mutton; 7.87 pounds of chicken; 1.75 pounds of turkey; 41.1 of a pound of duck; 83 of a pound of goose; and 28.36 dozen eggs. The estimated total consumption for the last year is: Pork, 964,885,673 pounds; beef, 588,509,857 pounds; mutton, 73,192,356; chicken, 82,553,400; turkey, 15,434,940 pounds; duck, 4,295,215 pounds; geese, 8,670,800 pounds; and eggs, 297,949,339 dozen.—Dominion Department of Agriculture.

Menace To Poultry Stock

Lice Are Greatest Danger To Life Of Baby Chicks

Poultry experts and practical poultrymen recognize the danger to the life of the baby chick if it comes in contact with lice or mites. Prof. J. Holmes Martin, of the University of Kentucky, points out that much of the loss among chicks raised on the farm can be attributed to lice and mites. He says: "The most important single factor in preventing loss from these pests is to free the mother hen and brooding equipment from lice and mites before the chicks hatch."

To rid the flock of lice, Professor Martin suggests the simple treatment of applying Black Leaf 40 to the roosts about one-half hour before roosting time. It should be painted on top of the roosts with a small paint brush or applied in a thin stream with an oil can. When the birds go to roost fumes are given off which kill the lice while the birds are roosting. It is necessary of course, in order to get a complete kill that all the birds spend the night on the treated roosts.

Somebody says snobbery is more rampant at flower shows than anywhere else. Haughtyculture, no doubt.

W. N. U. 2014

Lesson In Natural History

Fruit Dealer In London Says Wasps Work For Mankind

Do you hate wasps? Yes, but what do you know of them? I have received my first serious lesson in natural history written a Daily Sketch correspondent.

Hyde Park is swarming with caterpillars, and Arthur, the 70-year-old chair attendant, informed me that he had been waging war against them for the past 30 years. This waste of time annoys him, who spends his days retelling fruit at a spot near the Marble Arch entrance.

"Serves 'em right," she informed me. "Serves everybody right who owns 'em. Park for killing all the wasps like they do." She has an idea that wasps are the natural exterminators of caterpillars.

"To think 'ow they're treated nowadays," she said, with a shake of her head. "I allus say to everybody. Don't be too 'ard on 'em, fer if it wasn't for the wasps there would be no fruit, 'altho' I own they be a bit of a nuisance when they commence to crawl."

"They don't sting unless they're provoked. Why, if it weren't for the wasps a working 'ard all May you wouldn't get a strawberry, let alone a fruit 'arvest. Wasps be useful if they're let alone, and they do good work."

"I well remember the time," she went on somewhat dreamily, "when me uncle in the country used ter count on the wasps to keep down the grubs and insects, let alone the flies. Think of the hundreds of midgits they can swallow at a stretch."

"On some fruit trees and bushes the leaves be all curled back in a most curious manner. The farmers and gardeners call it 'blight,' but if they wasn't so fond of killing the wasps there wouldn't be so much blight, and the farmers and market gardeners can't do for their crops what the wasps can do. It's only since the farmers and the market gardeners 'ave 'unted the wasps and used insect-killers that there's been so much 'blight.'"

Magazines For McGill

About 3,500 Received Regularly By Montreal University

McGill University, Montreal, is one of the largest subscribers of periodicals in the world. Statistics completed show that the university regularly receives some 3,500 magazines. Some 2,000 of these are subscribed for in the regular way, a total of \$80 are presentation subscriptions, while 565 are on the exchange list with other institutions. The entire collection has been rated one of the best in the world by visiting librarians.

Constructed a century ago, the front of the British Museum, London, England, has been cleaned for the first time, only soap and water being used.

THE CORRECT FOUNDATION FOR YOU! IT Moulds THE FIGURE

Here's the most popular slip of the season.

And easy to make—well, I guess! Practically only two parts to the pattern.

It is pressed into inverted plaits at the side to allow perfect freedom without detracting from its straight unbroken line.

It may be made in ankle or street length. Style No. 797 is designed for sizes 14, 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust.

Size 34 requires 2½ yards of 35-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Delegates To League

Hon. R. J. Manion Will Head Canadian Personnel At Geneva

Canada will be represented at the meeting of the assembly of the League of Nations by Hon. R. J. Manion, Minister of Railways; Hon. Philippe Roy, Canadian Minister in Paris, and Dr. L. A. Riddell, Canadian Advisory Officer to the League. Announcement of the selection of the Canadian delegation was made by Sir George Perley, Acting Prime Minister.

Dr. Manion will head the delegation and left for Europe on Sept. 2. This will enable him to make a study of the situation before the opening of the assembly in Geneva on Sept. 25. Two substitutes were also named, Hon. G. Howard Ferguson, Canadian High Commissioner in London, who is now in Canada, and J. Denny, of the Law Office.

England will not pay its subsidy to grand opera this season.

Forest Nursery Stations Show What Can Be Accomplished In Reforestation Of The West

The scheme under which trees are supplied by the Dominion government for prairie farm planting in Manitoba, Saskatchewan and Alberta, was first inaugurated in 1901 by the late Hon. Clifford Sifton, who was at that time Minister of the Interior. At that time the general opinion was that trees could not be grown on the prairie and for that reason it was very difficult to interest farmers in this line of work. In January and February of 1901 a large number of farmers' meetings were held in the three provinces, at which the scheme was discussed. Very little enthusiasm, however, was aroused, only some 50 farmers in the three provinces expressed willingness to try out what they considered a very doubtful experiment. These first few plantings were successful and next year there was a larger demand, and 470,000 young trees were supplied to 421 farmers. Neighbors became interested, encouraged by the success of these first plantings. In 1904 1,800,000 plants were furnished to 1,020 applicants. From then on the demand increased by leaps and bounds. In 1929, 6,500 applicants received 8,500,000 trees and since that time from 5,000 to 6,000 applicants have been supplied each year.

Up-to-date 133,500,000 trees and cuttings have been sent out from the nurseries, of which 2,500,000 were spruce and pine. The Scotch pine and spruce are the evergreens principally used, and these are sold at a very nominal cost. Next spring the charge for these will be \$2 per hundred. The broad leaf kinds, such as maple, ash, elm, caragana, poplars and willows are supplied free of charge provided the farmers make application before the first of March in the year previous to planting. That is, those wishing now to plant in 1935 must apply before March 1, 1934.

In order to ensure a supply of seed for distribution, two nurseries were established, one at Indian Head, Sask., and the other at Sutherland, Sask. The control of the work is organized at Indian Head where the main office is established.

Until 1930 the tree planting division was a part of the federal forestry branch under the department of the interior, but in the spring of that year, after the natural resources were turned over to the province, the forest service was reorganized and it was decided to transfer the tree planting division to the department of agriculture, so that the nurseries now are part of the experimental farms system, under Dr. E. S. Archibald, director of experimental farms, at Ottawa.

The results of the work which has been carried out from the Dominion nursery stations during the past 30 years is very evident to any who were familiar with conditions on the prairie farms in the earlier years of development. While conditions, generally, on the prairie, are not particularly favorable for tree growth, it has, nevertheless, been conclusively demonstrated that when proper methods are employed, successful plantations are not really difficult to establish. On the prairie where rainfall is limited and climatic conditions extreme, plantations can only be successful when given proper attention. Where trees are neglected, they quickly deteriorate, but the benefits which may be derived from well planned shelter belts are so great that one is well repaid for the comparatively small amount of labor entailed in keeping them in good condition.

The farmers in these lines of stress in realizing more accurately what it means to have a good garden and fruit plot, which cannot be developed satisfactorily without adequate protection. Perhaps it is on account of the very unsatisfactory farming conditions at the present time that more interest is being shown in tree planting than ever before. Then, too, more interest is being paid to the improvement of the farm home by plantings of ornamental shrubs and flowers. Many who now have established shelter belts are getting very satisfactory results with fruit of various kinds, such as apples, crabapples, plums, hybrid cherries and all varieties of small fruits. Besides affording a very interesting line of work, practically all the fruit required for the farm family can be raised at home and often a very considerable surplus is raised which can readily be disposed of to neighbors at very remunerative prices.

At the Indian Head forestry station the grounds are laid out attractively planted with trees, ornamental shrubs, flowers and lawns and provide an excellent demonstration of what can be accomplished along these lines under prairie conditions. A small area is set aside also in which hardy varieties of apples and other tree fruits are grown, several acres of different kinds of trees in particular interest to those who may have any doubt as to the practicability of growing a home supply of fuel and fencing material. These plantations varying in age from 15 to 21 years furnished over 55 cords of wood last year from trees cut out as thinlings.

Visitors are always welcome and any who are within reasonable distance of either the Indian Head or Sutherland nursery stations, would be well repaid by spending a few hours going over the grounds and plantations.

Danger In The Kitchen

Place Where Large Percentage Of Accidents Occur

The kitchen doesn't ordinarily seem like a dangerous place—except perhaps, when a truly luscious concoction of indigestible dishes is hot and doesn't wish to be disturbed.

But there were 28,000 deaths last year from accidents which took place in the homes of the United States and fully 34 per cent of these occurred in the kitchen. Falls and scalds seem to be the most prolific sources of home accidents. And while it is a bit difficult to see just how a safety code can be devised and enforced for the home, a little care and forethought in the midst of the daily round of activities ought to save a good many lives each year.—Chatham News.

An old bachelor says that it is impossible for a woman to do anything better than a man. Evidently he has never seen a woman peak a trunk.

France has one doctor to every 1,596 persons.

EMBRACING HINDUISM FOR LOVE

A dramatic moment at Chalk Farm, London, as Miss Jessie Womack Kodley, an English girl, was rescued into the Hindu faith. At the left is G. R. Patil, son of a Hindu millionaire, whom she married a year ago. At the right is Dr. Moonga, president of the Hindu Maha Sabha, who performed the ritual that made the girl a full-caste Hindu.

WORLD HAPPENINGS
BRIEFLY TOLD

The "Royal Scot" which has visited Chicago World's Fair, will arrive in Canada at Vancouver. It will start its Dominion tour October 26.

Terms of a Franco-Russian commercial agreement for an interchange of products between the two countries was reported reached recently, following long negotiations.

Falling asleep in his father's grain field at Carvel, Alta., Mike Shalge, aged three years, was instantly killed when his father, not noticing the sleeping boy, ran a binder over him.

Archibald C. Manberg, C.I., former Canadian lumber trade commissioner in London, England, and prominent in Canadian lumber circles, died in hospital at Toronto, after a long illness.

The third plane bought by the government of Saskatchewan from the Royal Canadian Air Force this summer has been brought from Ottawa with Flight-Lieutenant R. Carter, chief pilot of the Saskatchewan flying service, at the controls.

Boys are better cooks than girls competing at the Canadian National exhibition, Toronto. Five classes—bread, rolls and buns, baking powder biscuits, ginger-bread and cookies saw boys win nine places and girls eight in the 17 awards.

Moving of freight across Fitzgerald-Fort Smith 16-mile portage by aeroplane now is under way, according to reports received from the north. The freight is placed aboard the planes at Fitzgerald and flown to Fort Smith at the rate of one ton per hour.

Canada's new conversion loan may possibly be launched around Oct. 1 instead of Oct. 15, the date previously under consideration, according to well-informed circles. The success of the Canadian loan in London and the improvement generally in the money market are given as reasons for moving the date ahead.

Prefer Staying On Ship

Fort of Churchill Has No Attraction For Sailors

While skippers of the deep water vessels who have arrived at Churchill this season say they are delighted with prospects of business in and out of the port, the crews turn a sad eye on the construction camps and the townsite.

They claim it is the duldest of all the 57 varieties of ports they visit in the course of a year or two. Sailors coming ashore, for the most part, play an odd game of English billiards, sip an occasional orangeade, and purchase a few picture post cards of Eskimos.

Then sighing for the "wine, women and song" of other harbor-fronts, they crunch their way over the gravel heaps and go aboard their various ships.

Bootblack Left Fortune

Accumulated Large Estate In Last Thirty-Five Years

Pietro A. Ierardi, of Elmford, who accumulated a fortune shining shoes, left an estate of \$150,815 gross and \$121,091 net, according to a transfer tax appraisal. Ierardi, who died on July 7, 1932, owned the bootblack concessions in the Grand Central Terminal in New York for 36 years. A native of Naples, he came to America when he was 15 years old and started his career as a bootblack on the streets. Only \$17 of his estate was in stocks and bonds. He had \$98,900 in New York and Westchester real estate. His bank accounts totalled \$21,000 and mortgages totalling \$7,289.

New Trade Envoxy

A new trade commissioner is to be appointed to represent Canada in Britain. It has been announced at Ottawa. His special duties will be to develop trade in Canadian fruit in the United Kingdom and he will receive an initial salary of \$4,380 and full living allowance. The department of trade and commerce expects to secure an expert in Canadian fruit growing for the position.

Vacuum cleaners are replacing the bucket and mop as deck cleaners on British war vessels.

W. N. U. 2010

Gas From Coal

Huge Industry Being Established, An Industry Which Will Furnish Much Employment

One of the most striking of all the developments that have recently taken place in Great Britain is that of the production of petrol from coal. A week or so ago Prime Minister Ramsay MacDonald announced in the House of Commons that it had been decided to place a preference of fourpence a gallon on petrol so produced, and this was immediately followed by the public statement of the Imperial Chemical Industries that the construction of a plant to cost \$35,000,000 at Billingham-on-Tees would be proceeded with at once.

This plant will produce 70,000,000 gallons of petrol a year. It will provide employment for 2,000 workers and will absorb the mine production of three thousand miners, that is 850,000 tons of coal a year.

Another plant is to be erected, probably at Doncaster which will give 20,000,000 gallons, giving work to 10,000 miners, and other plants are to be built throughout the coalfields including South Wales, Northumberland, Lancashire, Forest and Dean and possibly Kent. As soon as construction begins, work for 7,000 will be provided, it is estimated. Further the iron and steel industries will be immensely stimulated, and seven thousand more men will be required in the near future.

For years scientists have been engaged in endeavoring to perfect the process of obtaining petrol from coal. It has now reached the commercial stage and it is reckoned that a high quality can be produced for seven pence per gallon. But the preliminary experiments have been costly, the expenditures on them being estimated at \$250,000,000.

This great new industry is proving a veritable stimulus to Great Britain in its efforts to establish trade recovery. The benefits that will be derived from it by the coal industry and others are hardly to be imagined. To the coal miners, who have been such heavy sufferers by the decline in trade, it will be a godsend.—Regina Daily Star.

Recipes For This Week

(By Betty Barclay)

PARSNIP SOUFFLE

Cook four medium-size parsnips in boiling water until tender. Remove skins and rub through a colander. Mix together one teaspoon salt, one-eighth teaspoon pepper, one teaspoon sugar. Add to the parsnips together with one tablespoon butter. Melt two tablespoons of butter in a saucepan, stirring in two tablespoons flour and one cup milk. When the mixture is thick and smooth add to the parsnips, together with the yolks of two well-beaten eggs. Beat the white of the eggs until stiff and fold into the mixture. Place in a well-buttered baking dish and bake for 25 minutes in a moderate oven. Remove and serve immediately.

BLUEBERRY AND APPLE CONSERVE

2 cups blueberries.
2 cups tart apples, diced.
3 cups sugar.
½ cup nut meats, chopped.
Juice of 1 lemon, grated.
Rind of one-half lemon.
Combine all the ingredients except the nut meats. Cook until the mixture is thick and clear. Add the nut meats just before taking from the fire. Pour into hot, clean glasses. Seal tight.

Trying Out New Method

An electric "anesthetic" is being tried out in the slaughter house at Milan, Italy. The animal to be killed is subjected to a 70-volt current, which is said to make him insensible to pain for a time long enough to permit scientific slaughter. Until it can be fully determined whether the electricity has a harmful effect on the meat, the new system will remain in an experimental stage. Technical reasons forbid use of a current strong enough to produce instant death.

Artificially dried hay contains practically 100 per cent of the nutrient value of the original grass, vitamins included, and can be fed out to produce milk and cream of the same quality as produced when they are eating summer grass.

Winnipeg Newspaper Union

By Ruth Rogers

SNAPPY, WEARABLE AND CHIC AND YES SO EASILY MADE

Develop this modish dress in thin plain rough woolen weave in grey, topped by a tweedy striped grey woollen. You'll love it because it has so much dash and chic.

Plain or printed silks are also suitable. It is lovely in grey crinkly crepe silk with short puffed sleeves as in the small view.

Style No. 680 is designed in sizes 14, 16, 18, 20, 22, 24, 26, 28 and 40 inches bust.

Size 16 requires 2 1/4 yards of 35-inch material for skirt and collar with 1 1/4 yards of 35-inch material for waist.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Destroying Flower Bulbs

Holland Finds They Are Drug On Market At Present

A bulb-destruction week has been held in the Haarlem district particularly and in Holland generally. The object is the same as that of the Brazilians in burning their coffee—to reduce the supply and increase prices. The famous Dutch bulbs, once the pride of the nation, are now a drug on the market, after having made fortunes for many growers. In the Haarlem region they were brought in in carloads and thrown into garbage cans and refuse piles. Hundreds of thousands of tulips, hyacinths and narcissuses were destroyed in this manner. Destruction week was "decreed" by the "adjustment committee for rehabilitation of the industry."

Railway Accidents In Canada

A total of 152 railway accidents, with 16 persons killed and 157 injured occurred during the month of June in Canada, according to a statement issued by the board of railway commissioners. Out of the 152 accidents 15 took place at highway crossings, 11 occurring at unprotected crossings. Ontario led the provinces with seven highway crossing accidents.

One ounce of tungsten is used to make 17 1/2 miles of wire, three ten-thousandths of an inch thick, for three-watt electric lamps.

SUNDAY SCHOOL LESSON

SEPTEMBER 10

JONATHAN

Golden Text: "A friend loveth at all times."—Proverbs 17:17.
Lesson: 1 Samuel, Chapters 18-20.
Devotional Reading: Romans 12:1-5, 9, 10.

Explanations and Comments

The Covenant Between Jonathan and David, 18:1-4.—Jonathan, Saul's son, had watched David's brave deed, and he was present when Abner, the captain of the army, brought David, the victorious champion of Israel, into the king's presence. While Saul talked with David, Jonathan's heart went out to him; his soul was knit with the soul of David, and Jonathan loved him as his own soul.

As the devoted friendship of the two young men is disclosed in the narrative, we marvel at the disinterestedness of Jonathan. David's love for Jonathan did not conflict with his own interests, but Jonathan's interests were all against his love for David. Nothing could better express the attitude of Jonathan's mind. Dr. Matheson says, "than the words, 'Jonathan stripped himself of the robe that was upon him, and gave it to David, and his apparel, even to his sword, and to his bow, and to his girdle.' From beginning to end, the love of Jonathan for David was a disinterested love. Only the noblest man can love one who is a rival and whose success means one's own defeat."

"As one lamp lights another, nor
So nobleness enkindeth nobleness."—Lowell.

"Blessed are they who have the gift of making friends, for it is one of God's best gifts. It involves many things, but above all, the power of going to the heart of another and appreciating whatever is noble and loving in another."—Thomas Hughes.

Biologist Speaks On Heredity

Education Is Also Needed To Produce Brilliant Men

The children of brilliant parents will never be as brilliant as their parents, but they will be above the average," said D. Ward Cutler, the biologist, at the British Social Hygiene Council summer school at Oxford.

"Similarly, except in the case of feeble-mindedness, the children of low-grade parents will not be quite as low-grade as their parents, but they will be well below the average of the country."

"I do not believe that education will ever produce a great scientist, historian, or literary man, unless the necessary characteristics are born in him."

"Nor do I believe that heredity can ever produce any of these men without the right environment and education."

"Tenty of love and cod liver oil," was urged by Hon. Mrs. E. Franklin, as a better dictum than much of so-called "modern" training of children, at the World Federation of Education Associations in Dublin.

"With all our scientific planning," she said, "the child's heart still leaps when he beholds a rainbow in the sky. But this part of the child is often starved."

Symbol Of Friendship

Canadian Institute Of International Affairs Receives Picture From Japan

Symbol of Japanese friendship toward Canada, a handsome picture by a noted Japanese artist has been presented to the Canadian Institute of International Affairs by the Japanese group attending the Pacific Relations Conference. The picture was presented to the Canadian group by Dr. Inazo Nitobe, leader of the Japanese group and accepted by E. J. Tarr, Winnipeg, Sir Robert Falconer, Toronto, and W. M. Birks, Montreal.

The handsome-framed picture is about 3 1/2 feet by 3 feet in size and done in silk which, it is said, will endure almost 1,000 years. The painting was done by Juppō Araki, one of Japan's great artists, especially as a gift to Canada.

Many Apply For Job

Advertising for a girl to assist in his St. Catharines St. office, salary seven dollars a week, John H. Baxter, contractor of Montreal, received 460 replies from men and women. Applicants included former office and factory managers, members of the architecture and legal professions and graduates of the faculties of arts, science and engineering of McGill and Toronto Universities.

Linking World
By 'Phone

Faraday Building In London Will Serve Over 35,000 Subscribers

Faraday building, in the city of London, is to be the centre of a gigantic spider's web of world-wide communications, equipped to serve over 32,000,000 telephone subscribers.

When completed, its 11 spacious storeys, covering a superficial floor area of 109,000 square feet, will be the most scientifically controlled building in Europe.

Many scientific devices to assist the operators and safeguard subscribers have been added. These include:

Special automatic timing apparatus which checks conversation periods on the continental and inland trunk services to a fraction of a second.

Two stop-watches attached to the exchange panels used for radio telephone check calls to one-fifth of a second.

White and green lamps signify to the operator, by pressing a button, the state of traffic at the continental exchange. This saves time by advising subscribers of the length of delay. Small spot light systems reveal idle circuits associated with outgoing radio telephone or inland trunks.

Revolutionary changes are to be made in certain services to bring them up to date.

Chief among these will be the "extension in the autumn of the 'service on demand'" to practically the whole of the inland long distance routes from London.

Services to be housed at Faraday house will include: A new toll exchange to serve 1,000,000 subscribers in and around London; city and central exchanges to be transferred from Carter Lane, E.C., the intentional switchboard at Carter Lane to be enlarged.

Secret Is Valuable

How Soft-Mouthed Creatures Tunnel Hardest Wood Problem For Scientists

The following article by W. Beach Thomas, appeared in the London Spectator:

With our men of science who concern themselves with natural history settle the following point? How do caterpillars and other rather soft-mouthed creatures tunnel the hardest wood? In their secret mechanical or chemical? I saw this week a hole of stuporously hard English oak of considerable age converted almost into a comb by the caterpillars of the Goat Hawk moth. The beast is large and powerful and of that warning yellow coloration which looks impossible, but the tissue even of the mouth is soft, and a priori, it looks impossible that it should tunnel a substance which turns hard iron nails. It is a natural inference that the caterpillar ejects some chemical to help it. If so, it might be of no little importance to discover exactly what is this wonderful stuff which may make cellulose soft and palatable. Did not Mr. Haldane prognosticate this feat as one of the final revolutionary developments of the future.

Lens Made In Layers

British Opticians Have Perfected Unbreakable Glass For Spectacles

The great fear of spectacles being broken while worn and causing serious injury to the wearer is to be removed following long research by British opticians.

A lens made in layers, which, said the manufacturer to a newspaper representative, did not break when hit with a hammer, has been perfected.

It was tested for 500 hours with ultra-violet rays; boiled up to 500 degrees Fahrenheit, and baked in, an oven.

After that it was frozen in a refrigerator.

Rewards Not So Meagre

Reading that when Henry Travis of Pullman, Wash., won a local "brat-wheat" contest, fellow grain growers presented him with three gallons of ice cream, Junior is inclined to think that probably the rewards of agriculture are not so meagre as they recently have been pictured.

Aberdeen, Scotland, faces a water shortage.

CENTRAL BANK PLAN IS OPPOSED IN THE EAST

Halifax, N.S.—Creation of a central bank, widely advocated before the royal commission on banking in western Canada, did not receive support from the Halifax Board of Trade when that body made representations to the commission here.

It was the initial sitting which Lord Macmillan and his four colleagues have held in the Maritime provinces.

The brief of the board of trade was presented by A. B. Wiswell, vice-president of that body. It concluded by asking that the chartered banks be permitted to carry on as in the past, subject to such amendments of existing legislation on as the commission might consider advisable. The board of trade expressed the view that "the federal government at Ottawa, by keeping in touch with the Canadian Bankers' Association, or heads of the larger banks, is quite capable of providing for the financing of the country, the movement of the crops and to meet any emergency which may arise from time to time."

The Canadian banks had come through the years of "stress and depression" with credit to themselves and "with the commendation of other countries where serious banking conditions had prevailed," the board of trade asserted. It expressed the view that the expense connected with establishing a central bank would outweigh the benefits to be derived from its creation.

Lord Macmillan interjected that a central bank would not necessarily be a very costly affair. The control of credit and the issuance of currency were functions usually associated with a central bank, he said.

Under present conditions, for instance, there was some room for criticism because the control of the note issue was in the hands of a political body. Dominion notes were issued by the government after the deposit of certain securities by the banks.

Miners, fishermen, agriculturists and lumbermen in eastern Canada were also having a hard time, Mr. Wiswell reminded the commission in referring to western representations on behalf of the wheat farmer.

This view was heartily concurred in by A. H. Whittman, who took up the situation from the point of the dry fish industry.

"As far as I can judge there is no demand or desire for a central bank or for any drastic changes in the Bank Act," Mr. Whittman said. He had never been to the commission credit for his requirements by the banks.

Search For Old Forts

Expedition To North To Unfold Glamorous History Of Early Days

Prince Albert—A unique expedition left here recently when Professor H. A. Innis, of the University of Toronto, and J. B. Tyrrell, Toronto, president of the Kirkland Lake Mining Company, set off in an outboard motored freighting canoe with two guides to search for locations of old forts on the North Saskatchewan and Saskatchewan rivers east of here.

One of the objects of the expedition will be to relocate the remains of Fort a la Corne, originally established in 1748 by La Verandrie and first named Fort St. Louis. Some doubt has arisen as to the exact location of this fort and those on the novel expedition will attempt to remove these doubts. This is one of the oldest forts known in the history of the west and about it and the other forts in this part of the province is written the glamorous history of the early fur trading days when the flowing streams in this part of the province were the main arteries of travel. The two will spend a week in their quest.

Serious Feed Shortage

Toronto, Ont.—Feed shortage in Essex county, announced the Ontario Department of Agriculture, has left the cattle and hog-raising industry in the southern county in a serious condition. Probably 100,000 head of livestock, including cattle and hogs, will have to be sold at a sacrifice on account of feed shortage.

Deplores The Dole

Speaker At Calgary Contended That Relief Is Becoming A Racket

Calgary, Alta.—"Unemployment relief in Canada is becoming time more than a racket, with both politicians and unemployed engaged in it," declared Rev. J. R. Craig, of Winnipeg, in addressing a service club. "The Canadian system is a dole, pure and simple," he said, "encouraging pauperization."

The nation owes no man a living, he contended, but it does owe him the opportunity to make a living. The plea for "easy money" is based on false understanding, and easy money has ruined the western farmer, Mr. Craig declared.

The speaker asserted the Canadian Goodwill Industries of Winnipeg had started with nothing but donations of used clothing, furniture and other articles and the voluntary work of a few men and women, had grown to an institution paying \$15,000 in wages annually and providing employment for 100 to 150 persons.

Castoff articles were collected, repaired, and sold for wages. Though he did not hold it to be a permanent unemployment relief measure, yet he believed such schemes whereby a man was given a tool in his hand rather than a coin in his hat, were immeasurably greater values. The state was being called on to do what the individual should be doing, or the community, he added. The modern church had almost reached the limit of its helpfulness, for the reason its social service activities were left to the parsons.

Experiment Of United States Being Watched

Countries Interested In Stabilization Of Currency Through N.R.A. Operation

Banff, Alta.—If the United States can stabilize its dollar through the operation of the N.R.A., stabilization of currencies by three or perhaps four other great nations will follow, and thereafter will come stabilization of the currencies of the rest of the world. This, in brief, was one conclusion reached at the conference of the Institute of Pacific Relations just ended.

Meanwhile, other countries are closely watching the progress of the N.R.A. application, and the importance of the experiment, having regard to the social and economic welfare of the people of the world, cannot be overestimated, it was agreed.

Currency stabilization is linked with trade stabilization and with solutions of the problems of population pressure, so insistent in Japan and China; of trade conflicts, as, for instance, the bitter rivalry between Lancashire and Japanese textile powers, and of disturbed relations between countries. The dispute of China and Japan over Manchuria was given as an example.

Ontario's Relief Bill

Estimated Total Of \$50,000,000 To End Of Fiscal Year

Toronto, Ont.—At the end of Ontario's fiscal year, it is estimated a total of \$50,000,000 will have been expended within the province on relief by the province, Dominion and municipalities. Of this sum the provincial exchequer will have provided about \$13,750,000, the Dominion about \$9,500,000 and the municipalities about \$26,750,000.

From the first of 1930 to the end of July this year, the total bill was \$77,800,000, of which the province has contributed \$27,800,000, the Dominion \$23,100,000 and the municipalities \$26,900,000.

Brandon Aviator Injured

Accident Occurred When Propeller Of Monoplane Broke

Brandon, Man.—Crashing to the ground when the propeller of his monoplane broke, Alvin Kennedy, instructor for the Brandon Aero Club, escaped serious injury, but was detained at the Brandon General Hospital, where minor injuries were attended to.

The machine had been built locally and was owned by Gordon Brown. It had been taken up as high as 1,000 feet a few days ago, and as the pilot put it, "behaved well."

NOVA SCOTIA'S NEW PREMIER

Angus L. MacDonald, 43-year-old native of Inverness County, leader of the Liberal Party in Nova Scotia, which secured 22 out of the 30 seats, defeating the government of Hon. C. S. Harrington. The premier-elect has not hitherto had a seat in the House.

Americans In Danger

Request For Warship To Protect Priests At Foochow, China

Washington.—The state department reports that commander-in-chief of the Asiatic fleet has been requested to send a naval vessel to Foochow, China, where three Americans were reported to be in the danger zone of operations of Communist forces.

The request for a warship was made by the American Minister at Peking. The department said the purpose of the vessel was "to be available for the protection of Americans in the event of an emergency." Two warships, the Tulsa and the Sacramento, are within short steaming time from Foochow, the former at Swatow and the latter at Hong Kong.

The three Americans reported in the danger zone were Father Paul Curran, Father Bernard C. Werner, and Father John H. I. Werner.

Conquers English Channel

Dover, England.—The English Channel was conquered for the first time this year when Miss Sunny Lowry, 22-year-old Manchester girl, arrived at South Foreland after swimming from Cape Gris Nez, France, in about 15 1/2 hours. She had made two attempts before succeeding in becoming the 18th swimmer and the eighth woman to swim the treacherous strip of water.

Believe Driver Was Asleep

Lethbridge, Alta.—Automobile accident which caused the deaths near Macleod, Alta., of Constable Joseph Farrell and Sergt. J. Blockidge, both of Lethbridge police force, resulted when Farrell fell asleep at the wheel in the opinion of the coroner's jury empaneled here.

Conciliation Board

Will Hear Wage Disputes Of Railway Employees

Ottawa, Ont.—Hon. W. A. Gordon, Minister of Labor, announced he had appointed two boards of conciliation to hear wage disputes between the Canadian National and Canadian Pacific Railways and their clerks, freight handlers and station employees, numbering about 3,000.

The first board will inquire into a dispute between the Canadian Pacific Railway and its clerks, freight handlers and station employees, numbering about 3,000. George S. Currie, Montreal, and W. F. O'Connor, Toronto, will be two members of the board, representing the company and the men. They will select a third member who will be chairman.

The second board will investigate two wage disputes between the Canadian National Railways and its men. The first dispute involves 4,300 men, clerks, freight handlers, laborers and employees of the ferry service between Tomintown, N.B., and Borden, P.E.I., and wharf employees at Halifax. The second dispute involves 847 employees, clerks of the railway's headquarters at Montreal. Two members of the board will be F. C. Dobell, Montreal, representing the company, and Rev. Russell McGillivray, Ottawa, representing the men. They will choose a chairman.

Dawson Has No Unemployed

Recent Activity In New Gold Fields Has Absorbed Labor

Victoria, B.C.—Dawson, in the Yukon, is one city in Canada that can report an absence of unemployment, according to G. A. Yardley, customs inspector, who has returned from an annual inspection tour of the Yukon. All labor in Dawson has been absorbed by recent activity in new gold fields, Mr. Yardley stated, and he predicted another boom in the Yukon country.

Freight imported into the country this year was 800 tons greater than 1932 figures, which in turn were 500 tons greater than those of 1931.

He predicted that output of gold from the Yukon this year would be between \$350,000 and \$400,000 greater than last year.

Raps National Recovery Act

Nebraska Man Describes New Movement As "Pure Bunk"

Lincoln, Neb.—John H. Simpson, president of the National Farmers' Union, said he didn't blame individual farmers for taking all the government would give under the United States crop reduction plans, but added:

"It is against the laws of God and nature to plow up cotton, destroy chickens and take away the food, and limit production."

The N.R.A., Simpson asserted, is "bunk, pure bunk to keep the suckers' minds off the real thing and is invented by Morgan and Mellon and others."

U. S. EMBARGO ON GOLD EXPORTS IS WITHDRAWN

Hyde Park, N.Y.—Acting with dramatic suddenness, President Roosevelt relaxed the United States gold embargo to permit sales of the newly-mined metal in foreign markets, where prices are higher.

At the same time the president tightened the prevailing restrictions against hoarding by requiring all persons holding gold coin, gold bullion or gold certificates in excess of \$100 to file statements of their holdings within 15 days.

After 30 days all private gold holdings of more than \$100 will be prohibited unless valid reasons are shown why the metal cannot be replaced by currency.

The decree would appear to nullify the recently authorized plan permitting American producers to export concentrates and amalgams to Canada and other countries for refining and export. Leading United States producing mines had applied to Canadian authorities for refining of their gold ore, but the order relieves United States producers of the necessity and expense of exporting for refining and round-about marketing.

Treasury officials interpreted his order as meaning that newly-mined gold could be sold in the world market at prevailing prices of around \$50 an ounce as contrasted with the fixed price of \$20.67 paid by the mint.

Gold mining shares immediately shot upward on the New York stock exchange, one issue advancing more than \$15 to a record high.

Treasury department officials foresaw a quickening of activity in the gold mines of the west with profits increasing by more than \$15,000,000 a year, as the president reopened the export trade to American miners. The presidential decree is effective immediately.

Junior Trade Commissioners

Two Western Candidates Qualify For Appointment

Ottawa, Ont.—Robert A. Cameron, Edmonton, and Christopher H. West, Cranbrook, B.C., were among the six high ranking candidates for posts as junior trade commissioners, the civil service commission announced. They probably will receive appointments shortly.

J. M. Boyer, Hartland, N.B.; Greig B. Smith, Ottawa; G. Nairn, Montreal, and Leland Auman, Toronto, were the others in the first half dozen trying examinations.

The 400 candidates wrote on the examinations after which oral examinations were given to 87 who stood highest, the examiners traveling across Canada for the purpose. The six candidates will be named junior trade commissioners, it is expected.

Train Goes Through Bridge

Five Drown And Many Missing In U.S. Mishap

Tucuman, N.M.—At least five persons were killed, 25 injured and many passengers missing when the "Golden State Limited," crack Rock Island train, plunged through a bridge into a water-filled draw five miles west of Tucuman.

Seven coaches went into the water, along with the locomotive. The draw, ordinarily dry, was a raging torrent fed by heavy rains.

The "Golden State Limited" was eastbound from the Pacific coast.

Passengers Got Thrill

Sky-Riders, Stalled Between Towers For Over An Hour

Chicago.—Several passengers on the sky ride at the world's fair had a thrill when three cars were forced to halt in mid-trip by a broken telephone wire that fell across the cable supporting the cars. Hanging 210 feet above the lagoon across which the ride takes passengers between 630-foot towers, the passengers remained calm and surveyed the fair grounds for more than an hour while workmen in tiny chairs that ran out on the cables fixed the wire.

Here is the triumphal procession with which the Eternal City welcomed General Italo Balbo and his men on their return from the epic mission to Chicago and back. The parade is shown coming through the historic Constantinian Arch on the way to Palatine Hill, where the fliers were received and decorated by Premier Mussolini. At top, Il Duce is shown decorating Balbo.

Gambling with Wheat.

The ordinary man in the street must have been a bit puzzled, says an exchange, at the recent violent fluctuations in the wheat market. One day he read that there was a great wave of buying at Winnipeg and Chicago, the central market for Canadian and U. S. grains. Wheat shot up 10, 15, 20 and even 25c a bushel at a time. The same with corn, rye and barley. Next day he'd read that the joyous feelings of yesterday had subsided; wheat and other grains had fallen by almost as much as they had advanced. Tomorrow he may read that prices had shot away up again—and so the game goes on. Up and down alternately amid frenzied excitement on the part of buyers and sellers, and to whom the matter of a cent one way or the other may make all the difference between being rich or poor.

Weather and other conditions do not suddenly create all that disparity in the value of grains. One does not read of violent fluctuations in the price of carrots, potatoes, cabbages or apples. And yet they are subject to the vagaries of weather and pests in the same way that wheat is.

The reason for the gyrations of the grain market, more especially wheat, is said to be the manipulation by speculators who gamble with one of the vital sources of life. They bid for wheat that they never see and never intend to take delivery of. They possibly would not know wheat from barley if they saw two samples side by side. To them wheat is just something to gamble with. The interest of the millions of consumers means nothing to them.

When the "spread" is as much as 25c a bushel in a single day, there is room for reform some where.

Church Services.

German Lutheran services will be held in Stony Plain next Sunday at 10.30 a.m.

Service at St. Matthew Lutheran Church, Spruce Grove, 10.45 a.m. next Sunday.

Services in St. Philip's Church next Sunday, 11.00 a.m.

Leave Orders at Christie's Cafe

Since 1883 when the late Henry Beatty, father of H. W. Beatty, chairman and president of the Canadian Pacific Railway brought from Scotland three vessels equipped with sail and steam as was the regulation at that time, for service on the Great Lakes, thousands of travellers have enjoyed this delightful inland voyage from Owen Sound and more recently from Port McNicoll through the locks at Sault Ste. Marie to Port William and Port Arthur.

It is a fitting tribute to the service maintained by the Canadian Pacific that for fifty years this particular mode of summer travel is still considered a necessary part of one's Canadian travel itinerary as evidenced by the large passenger lists on the S. S. Keweenaw and Assiniboia leaving twice weekly from Port McNicoll and on the S. S. Manitoba from Owen Sound weekly. The two former vessels have been in continuous service since 1908 and provide commodious quarters and an excellent table for those seeking quiet relaxation, fresh lake breezes and pleasant travel companions. Both the Keweenaw and the Assiniboia, 4,000 ton steamers, have had but three captains among whom Captain McManual on the Assiniboia is considered one of the best-known authorities on Great Lakes shipping. Until a few

months ago there had been but three managers the late Henry Beatty, the late Arthur Piers, father of A. S. Piers, manager of the Real Estate Department of the Canadian Pacific and M. McDuff, now assistant to the chairman, Canadian Pacific Steamships. Alvin Gallagher is now superintendent.

Since the S. S. Algonia went ashore on Isle Royale in 1885, no vessel employed in this service has been lost. The S. S. Manitoba also carrying freight from Owen Sound, was built in the Polson Iron Works in that city, the remaining ships in Scottish yards.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On their first date Peter spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the financial pace. A chance meeting, however, proves the way for another date. This time they walk in the park.

(Now On With The Story)

CHAPTER VII

"You think I am going to art school for the novelty of having something to do," Camilla began, as they walked through the park, "and that I haven't a serious thought in my head. You think I am a girl with a fortune and not an idea of earning a penny of my own. That's the girl you think I am. But you're wrong. My classes at National are only a part of my training to become a commercial artist. That means I want to work, and have to work. I'm not dabbling with art for a pastime, as you have been thinking. What's more, I'm not even planning for a distant future with the possibility of success as a famous artist who creates beautiful and lasting things. I intend to commercialize whatever talent I have just as soon as possible. Covers for magazines that will be gilded and lacquered, artistic illustrations for stories that will be read and forgotten, fashions that are whims for a day, glaring advertisements for linoleum, tooth paste and whatnot. In fact, I'll do anything I have a chance to try. Now you know." She stopped abruptly and the soft silence of the night closed in about them isolating them.

Finally Peter said, "Know what? I'm glad to know that you are ambitious to do something for yourself, and all that, but what's that got to do with—my forgetting you and your being blue?"

"Because I'm just a poor little rich girl who has to earn my own living after the first of September, next."

Peter was puzzled. "But you are the Hoyt girl, aren't you? I supposed you were only dabbling in art for amusement. Are you really serious?"

"Just as serious as my situation. I really am a little frightened, Mr. Anson—about earning my living, I mean. Sometimes I get to wondering how I could be of any service that would be worth money to people."

"But your fortune—" "I have no fortune. And my name is not Hoyt, really."

He shook his head in bewilderment. "I'm still floundering."

"I don't mind telling you all about it, if you still care to listen."

"I'm very anxious to know." Camilla turned on the bench facing him, and began earnestly, like a child reciting a story. "To begin at the beginning, I am one of a family of nine children—the middle one. My real name is Lorenz. But I didn't know that until three years ago, when I had been riding in the clouds for fourteen years and suddenly had to come down to earth in a parachute. I almost got tangled up in the strings and things, but I finally landed feet first and looked around to

★ ★ AN EASY WAY OUT OF A MEAN JOB ★ ★

Free Booklet

The Gillett's Lye Booklet tells you how to avoid the drudgery by using this powerful cleanser and disinfectant for dozens of heavy cleaning jobs.

Also contains directions for soap making, disinfecting and other uses on the farm. Ask for free copy. Standard Brands Limited, Fraser Avenue & Liberty Street, Toronto, Ontario.

Stains flush off with Gillett's Lye . . .

ONCE a week just pour Gillett's Lye—full strength—down your toilet bowls and drains. It removes all stubborn stains without hard scrubbing and rubbing. Cannot harm enamel, is non-injurious to plumbing. Kills germs and banishes odors, too.

Keep a solution of Gillett's Pure Flake Lye on hand for all your household cleaning. One teaspoonful dissolved in a quart of cold water

makes a safe, economical cleanser. Use it for greasy pots and pans, the kitchen floor, sinks and bathtubs.

And be sure to get the genuine Gillett's Pure Flake Lye. Order a tin today. Ask for it by name at your grocer's.

GILLETT'S LYE

*Never dissolve lye in hot water. The action of the lye itself heats the water.

EATS DIRT

see where I was. It wasn't such a beautiful place as I had left, either. "But how did you get up in the clouds in the first place?" Peter interrupted, amused with her quaint metaphor.

"Oh yes, I'm getting ahead of my story. I went up when I was four years old. It was this way. My people had come to America before I was born, and they hadn't done so well here at that time, it seems. Anyway, once when I was four years old, a volunteer social relief worker came to our house to tell mother how to put more water in the soup kettle so that she could feed nine mouths with half rations. Of course, my mother having lived in southern Europe, where many of the people are

I wished to do. But I would not be an heir to the estate."

"But why not?" asked Peter. "Adopted children usually inherit estates from foster parents, especially if they have no direct heirs."

Camilla gestured with the eloquence of her Latin heritage. "Don't ask me riddles. Why does a fish swim? Who knows? This was some whim of an idea, no doubt. Perhaps they feared I should waste my inheritance on my large family, or they would take it away from me. As I said, I rode in the clouds for years. You can imagine what it was like for me—gownless, imported frocks, constant attention, people telling me how pretty I was, and all the rest. When I was eighteen, I made my

of it by training myself, while I had the chance, to make my living after I was dismissed from my adoption.

Of course, I had to defy their wishes by studying to be self-supporting instead of angling to be the mistress of a fortune. That's why I have the blues," she concluded suddenly.

"I'm sorry, I troubled you. I don't know why I should tell you, Mr. Anson—" "I do," he declared vehemently. "Because I've been waiting terribly to know you ever since the first time I saw you—but I didn't dare to presume to a friendship with Miss Hoyt. I can be a friend to Camilla Lorenz."

"Why do you say that?" she asked with surprise. "Because I met Peter Anson, struggling for my degrees and possibly a scholarship with a year in Paris, and not a dollar in the world to back me."

A little groan of horror escaped her. "And I let you spend all that money on me the other night!" her voice almost sobbed.

He laughed shortly. "That was rather a strain. But I'll manage," cheerfully. "Did you think I was better to J. P. Morgan?"

"I didn't know," with consternation. "You see I really haven't much sense yet about money—in that way. And you impressed me so with your importance. I didn't care a thing about the show and the Mador Club, but I thought if I didn't suggest the swankiest places in town, you would laugh at me. I don't mind if other people laugh at me, but I didn't want you to," her voice was almost a whisper. "If only I had known—can you forgive me, ever—Peter—"

"Camilla—why, you darling—you're crying—please don't—" She was in his arms, their faces pressed close, trembling with happiness.

"Peter—I'm crying because—I'm so happy—to be here with you," she whispered. "The blues are all gone for always."

(To Be Continued.)

"The Blues Are All Gone."

on half rations most of the time, and the wealthy Mrs. Hoyt never having known how soup was made—she could do that. Anyway, it seems that I was quite a pretty child—in fact, a beautiful child—" "I don't doubt that," he interrupted again.

Camilla dismissed that with a gesture of impatience. "And the rich lady who had no children of her own was so captivated by me that she came to see us again and wanted to take me home. The attraction was mutual. I liked the grand lady and wanted to go home with her when she suggested it. My parents objected at first, but she finally persuaded them to agree. It was my mother who did the objecting, it being my father's policy that there were plenty more where I came from and he already had more mouths than he could feed, anyway. Mr. Hoyt was to adopt me until I became of age. She promised to do everything for me that money could do: private schools, social advantages, travel and special education. I would be her daughter until I was twenty-one. Then I should decide for myself what

debut. Soon afterward, I learned the facts. Naturally, it was a shock. Then I learned that my foster mother was ambitious for me to marry wealthy, which would solve my problem very nicely. Prospects were offered to me continually, always with the deceitful rule that I was the Hoyt heiress, to double the attraction. Foreign titles, industrial fortunes, social leaders. I despised it all. At first, I announced that I would leave them and be independent. But I learned that it was legally arranged for me to live as Camilla Hoyt until I was twenty-one. So I decided to make the best

When Your Daughter Comes to Womanhood Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

THE RHYMING OPTIMIST

By Alice Michalcio

WITHIN THE DREAM

In truth, I know I cannot mold Life's ways to my desire; But could you know the hopes I hold, My vision's flower and fire!

Could you but glimpse the loveliness Which is my goal and guide, Like shine and gladness of April's dress,

Like sunset on the tide; You, too, would then forget the care, The burden of the day,

Could you in this rich dower share Of glory's hidden way!

The world, perhaps, must laugh at me, The dreamer passing by, With spirit drenched in ecstasy And rapt, unseeing eye.

But though I know I cannot mold Earth's ways to my desire, I dwell within the dreams I hold, My vision's flower and fire!

In Italy silk is now used for the covering of saunages. What is used for the inside remains as ever a mystery.

Little Helps For This Week

"They go from strength to strength."—Psalm 74:7.

"First the blade, then the ear, then the full corn in the ear."—Mark 4:28.

Build these more stately mansions oh my soul.

As the sweet seasons roll; Leave thy low-vaunted past; Let each new temple nobler than the last.

Shut thee from heaven with a dome more vast, Till thou at length art free, Leaving blue outgrowth shell by life's unresting sea.

—O. W. Holmes.

High hearts are not long without hearing some new call, some distant clarion of God, even in their dreams, and soon they are chartered to break up their camp of ease and start on some new fresh march of faithful service. And looking higher still we find those who never wait until their moral work accumulates who do the good only to see the better, and see the better only to achieve it, who are faithful for remorse, too earnest for repose, whose worship is action, and whose action is ceaseless aspiration.

—J. Martineau.

Chinese Trainmen Executed

Three trainmen whose alleged carelessness resulted in a wreck between Kinkiang and Nanchang that caused between 30 and 50 persons to be killed or hurt were executed by Chinese authorities. The wreck occurred when the train jumped the track. Of the 500 passengers, 200 were military cadets.

RHEUMATISM GOT HIM

80-years-old Pianist is Relieved by Kruschen

Although old age has not yet kept this man from his occupation as a pianist, rheumatism had threatened to do so recently.

"Two years ago," he writes, "I was suddenly taken with rheumatism, all down my left arm. I tried many things—all to no purpose. I then commenced taking a half-teaspoonful of Kruschen Salts every morning, and soon felt benefit. My arm, which was painful and nearly useless, to my astonishment, is now, after a few weeks' treatment, quite better. I am more than pleased, as I am a pianist, and playing music matters worse. I am just entering my 80th year, and am in good health."—G.L.A.

The mineral salts of Kruschen have a direct effect upon the whole bloodstream, neutralizing uric acid, which is the recognized cause of rheumatism. They also restore the eliminatory organs to proper working order, and so prevent constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

For PIES, PASTRIES and MILK PUDDINGS

Ask any good cook to tell you the secret of her success and doubtless she will say that to get a delicious dish, however fancy your cooking you should always use St. Charles Evaporated Milk. It is second, hardly and makes possible a great variety of new and tasty dishes that you and your family will delight in.

ENTERING THE HIGH SCHOOL.

Thousands of young men and young women (they aren't boys and girls after they get out of the grades) are entering High school this year, and if they are the right kind of young people they will get the right kind of thrill from the experience.

Entering High school is an epochal event in the life of anyone blessed with the opportunity. Most students never get beyond the graduation period in the High schools. After that they either go to work or loaf, or do a little of both.

A great many young people who enter High school never graduate. This is a sad mistake for them to make; and a still graver mistake on the part of the parents, providing the latter deliberately gave their consent to a young person leaving High school without graduation, when it is not necessary.

The first day in High school marks the beginning of an important event in the life of the young man or the young woman who enjoys the privilege of acquiring this important education.

There will come a time in the history of this country when a young person without a High school diploma is going to find things pretty hard in this life. Education is the stepping stone to success and independence.

Those who have entered upon High school life at this time are to be congratulated: they are marching over a royal road, and paving their own life's highway so that progress will be smooth and sure.

Duffield Doings.

Said to be victims of an automobile accident, Mr and Mrs Collinridge of Duffield were in the General hospital, Edmonton, Tuesday, suffering from shock and bruises. They did not tell their physicians how the accident happened, and the police had no report on it.

Early Saturday morning fire destroyed the residence of Henry Hinkel on his farm at Mewassin. Some members of the family were forced to make a hurried exit.

Complaint is made of the poor condition of Mewassin road. Night travel on it for automobiles is practically out of the question.

Open Seasons for Game.

South of the Clearwater and Athabasca rivers the open season for game birds starts at noon on Friday, Sept. 15th. Ducks, geese, rails, coots and Wilton snipe are classified as game birds.

The bag limit on ducks in Sept. is 15 a day; from Oct. 1 to Nov. 14 the limit is 25 a day; with a bag limit of 100 for the season.

The bag limit on geese is 10 a day; 25 for the season.

Prairie chicken — No open season.

Hungarian partridge—Sept. 15 to Nov. 30; bag limit 50 a day, 200 for the season.

If the Police Tag You.

Following the orders issued by Chief Shute for a stricter compliance with Edmonton's bylaws governing motorists, the offender has had it made easy for him, providing it's his first offence. Now a motorist getting a police tag only needs to report at headquarters. No charge is laid against him if he is ready to admit the offence alleged against him, and he is taken before Accountant Reynolds, who collects a straight \$2, without the costs. If the motorist denies the offence, he goes through police court under the old procedure.

Offences which can be cleared up immediately before the accountant include all those under parking regulations, speeding past schools, and through subways. Offences under the highway traffic act must go through court.

To Strike, or Not to Strike?

A new light is thrown on the prospect of a strike among men on the two great Canadian railways. Members of six of the running trades in connection with the lines are at present engaged in taking a strike ballot as a protest to a further reduction in wages. While a large number are said to be in favor of a strike, some believe that it would not be successful, due to various causes. One phase is said to be the possibility of railroaders who haven't worked for 2 or 3 years as a result of the cutting down of crews, being willing to work for the railways during the strike and make some welcome money.

Further, oldtime railroaders who are nearing pensions and retirement after years of faithful work are not in favor of doing anything which would jeopardise their pensions. It is claimed they would sooner work for less money at the moment than get nothing after retirement.

On the Side.

Among the matters to be discussed at this week's meeting of the town council will be that of a new walkway for residents of the sub division east of Meridian road.

Having been laid down cheaply some years ago, the sidewalk has for some time past been in a very dilapidated condition; so much so that fears have been entertained that an accident may occur there, and the town be mulcted for a hospital bill or damage suit. Taxpayers in this block were called together a short time ago and a plan of action drawn up. Apparently, the matter rested there. In view of the fact that the time is short for proceeding with work of this kind, it is thought probable the Council will step in and order the work done.

It is announced that Stony Plain is to have a graveyard all to itself, after getting along for the past quarter of a century with only about a dozen or so "last sad resting places" within bailing distance of the burg. Several years ago a gentleman farmer south of town was in communication with the then Secretary, when the aforementioned farmer offered a suitable site for a graveyard about three miles out; but nothing came of the project, as some residents considered it "too far away." With the idea of having such a place close at hand, several locations are said to be under consideration—a plot on the Davis farm, on Meridian road; a small section of the Harnel farm; and a site at the northeast corner of Station St. and Main St.

On the purchase of the site being completed, then will arise the question of a fence for same; which reminds the writer of a case some years ago down East, when a pastor tried to have a guard rail erected around the churchyard, and waited on Pat, a paragoner, soliciting a contribution. "Well, your reverence," Pat replied, "the place don't need no fence; as thin what's in can't get out; and I'm dem sure thin what's out don't wanta get in; so why have a fence?"

Altho the season for ducks don't open till the 15th, there is now an open season for school text books which have lost their pristine lustre. These are now on sale at still another Main street establishment, contiguous to the printshop. The other book dealer just recently in the business, who was given some free publicity last week in this column, reports "business good." When his line of books is further depleted, he intends supplementing this with a line of canned goods.

The Fr. devil's short story:

Once upon a time there was a restaurant proprietor who thought his youthful patrons acted a little too frisky on the premises, and stuck up a sign which read "Boys! Please Not Here Like You Do At Home!" Next week the glass top of a show case was pounded thru by a youth with his fist. Within a week another patron had his head rammed through the banquet-hall window; following these escapades, an early riser upset a dining table with his head; and still another backed into a glass show case, resulting in a \$17 damage. Yesterday the Prop. put the sign in the fire.

What Drove Him to Drink

"A habitual drunkard," says a medical report, "should be treated by a physician." He shouldn't be treated at all, that's what made him a habitual drunkard, says an exchange.
